|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| Modulation of Notch signaling pathway in activated hepatic stellate cells does not ameliorate the outcome of liver fibrosis in carbon tetrachloride and DDC-feeding models        |     | Šisl, Dino; Planinić, Pavao; Novak, Sanja; Filipović, Maša; Flegar, Darja; Šućur, Alan; Turčić, Petra; Kovačić, Nataša; Kalajzić, Ivo; Grčević, Danka; Kelava, Tomislav   |                  |
| Serum Concentrations of Chemokines CCL20, CXCL8 and CXCL10 in Relapsing-Remitting Multiple Sclerosis and Their Association with Presence of Antibodies against Epstein-Barr Virus |     | Košćak Lukač, Jelena; Bačić Baronica, Koraljka; Šućur, Alan; Sremec, Josip; Tomasović, Sanja; Baronica, Robert; Kelava, Tomislav; Grčević, Danka; Kovačić, Nataša         |                  |
| Distinct association patterns of chemokine profile and cardiometabolic status in children and adolescents with type 1 diabetes and obesity                                        |     | Špehar Uroić, Anita; Filipović, Maša; Šućur, Alan; Kelava, Tomislav; Kovačić, Nataša; Grčević, Danka                                                                      |                  |
| rhBMP6 in autologous blood coagulum is a preferred osteoinductive device to rhBMP2 on bovine collagen sponge in the rat ectopic bone formation assay                              |     | Ivanjko, Natalia; Štoković, Nikola; Milešević, Marina; Rumenović, Viktorija; Windhager, Reinhard; Sampath, Kuber T.; Kovačić, Nataša; Grčević, Danka; Vukičević, Slobodan |                  |
| Midline 1 kao posrednik proupalne signalizacije receptora Fas u mijeloidnim stanicama mišje koštane srži                                                                          |     | Priselac, Sara                                                                                                                                                            |                  |
| In the eye of the beholder – how course delivery affects anatomy education                                                                                                        |     | Banovac, Ivan; Kovačić, Nataša; Hladnik, Ana; Blažević, Andrea; Bičanić, Ivana; Petanjek, Zdravko; Katavić, Vedran                                                        |                  |
| Three decades of the Croatian Medical Journal – can small non-profit journal compete in the bibliometrics arena?                                                                  |     | Kovačić, Nataša; Petrak, Jelka                                                                                                                                            |                  |
| Transcriptome profiling of osteoclast subsets associated with arthritis: A pathogenic role of CCR2hi osteoclast progenitors                                                       |     | Filipović, Maša; Flegar, Darja; Aničić, Sara; Šisl, Dino; Kelava, Tomislav; Kovačić, Nataša; Šućur, Alan; Grčević, Danka                                                  |                  |
| Uloga signalnog puta Notch u jetrenim zvjezdolikim stanicama tijekom razvoja mišjeg modela jetrene fibroze                                                                        |     | Šisl, Dino                                                                                                                                                                |                  |

|                                                                                                                                                                                                |  |                                                                                                                                                                                                      |  |
